**YOU ARE THE LIGHT OF THE WORLD!**

**The Prophet's Purpose:**

***See the Future to Change the Present***

Saturday, January 7 10 AM - 5 PM

**Your New Year's Revolution:**

***Reset Your Energy, Reset Your Life***

Sunday, January 8 10 AM - 5 PM

This year, let your light shine even brighter. You ARE the light of the world. It is when you hide your light that the world becomes darker. If you see something in the world that you don't like, shine your light even more and the world will begin to lighten. Be a lamp unto yourself and you will not only see the world and your life in it differently, but the world will follow your light. And as long as you shine your light, you won't be discouraged. Step-by-step, you will approach your destination in life and the world will change for the better.

Throughout the ages, the prophet's job has been to illuminate our future so that we may discover what we need to change in the present and create a better future. In Saturday's seminar, you are the prophet and you'll have fun learning to look at the future, both our collective future and your own personal future. You'll also learn how to use what you see of that future to illuminate how you need to change your relationship to what you are seeing, what you need to become more aware of, and what you need to do to change the

present. Of course, as you change your present from the inside, you will most definitely affect how your future will play out. Since you are the author of your own life, this is an opportune time for you to work on your re-writes. You've already written your rough drafts before - that's what you'll be reading as your future chapters. And, just as good writers do with their manuscript - even if it reads quite well already - you'll review, edit, and re-write as many times as you see fit until the story plays out exactly the way you envision it for the world. A writer does this not because he failed the first time. He re-writes to make his writing sing from his heart and soul that it may light up the world. Would you want anything less for your whole life?

The start of a new year is a perfect time for re-writing your life. It's time to sand down the rough edges, polish up your vision, and make sure your foundation is strong. When you are re-writing, you are also re-setting the energy of what you've written. If what you've written earlier doesn't quite express the energy you envisioned for it, it's time to re-set the energy of what you write. It's the same with your life, too. So, in Sunday's seminar, we'll explore the energy of your life as you've been living it and see how you can re-set your energy so you can live more of the life as you envisioned it. What has been impossible to accomplish in one kind of energy often becomes relatively easy to do in a different energy environment. It's a little like having a hard time writing a joyful story full of humor in a dark, stuffy, and overheated closet, but the moment you step outside and take a short walk in nature and breathe in some fresh, cool air, you feel inspired to write the story again. That's just one physical example of re-setting your energy. But, often, you might not have the time or space to do something physical to change your energy and space. You need to re-set your energy from the inside. So, you'll learn how to do that in this seminar. You'll also learn how re-setting your energy will re-set your whole life. Once you re-set your energy, the course you will take in life changes as well. The more consciously you re-set your energy now, the brighter your future will be. Awareness is light so when you do things unconsciously and mindlessly, your life goes much darker. If, instead, you re-set your energy in awareness, you will lighten up your life.

Throughout each of the two all-day seminars, you'll learn powerful psychic energy tools to use in your daily life to not only shine your light more brightly, create a more beautiful future, and heal the world around you, but also, to continue to see the future to change the future and re-set your energy and re-set your life. After all, you may make a monumental change in your life, but without regular action, consistency, and follow-through, it won't stick and you'll be back in the same rut. Give yourself this opportunity to shine your light and set the course for your new year! We look forward to seeing you in Novato.
